**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to method for detection of sepsis-like systemic infections comprising testing for the presence of a peptide prohormone other than procalcitonin.

Group II, claim(s) 6, drawn to method for detection of sepsis-like systemic infections comprising testing for the presence of DP IV.

Group III, claim(s) 7, drawn to procalcitonin 3-116.

Group IV, claim(s) 8, drawn to method of making procalcitonin 3-116.

Group V, claim(s) 9, 10, drawn to method of using procalcitonin 3-116.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is measurement of a peptide prohormone other than procalcitonin. None of the other groups share this special technical feature. The special technical feature of Group II is the measurement of DP IV, which is not recited by any of the other groups. The special technical feature of Group III is procalcitonin 3-116. Although Groups IV and V recite this compound, the PCT rules provide for the examination of the first claimed product, method of using and method of making in a single application. In this case, the first claimed invention specifically excludes procalcitonin. Therefore, the final three Groups are also separated, as they do not share a special technical feature with the first claimed invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
